

Good Afternoon Families,

We have updated our quarantine policy. Our goal is to reduce classroom closures and keep families at work while maintaining a safe and healthy environment. If you need a home testing kit, email the site director. [Cindy Britt](#) at the Clifton Road site or [Lasheenia Fields](#) at the Clairmont site. Thank you for being patient with us while we worked on updating the policy.

Quarantine for people ages 2+

Fully vaccinated people who have been exposed while in the early childhood environment are not required to quarantine as long as they do not have COVID-19 symptoms. They can attend school. However, they must test on day **five** after the exposure. If they develop symptoms or test positive, they will enter a 10-day isolation period. They must wear a mask for 10 days except when eating, napping, or playing outside.

Unvaccinated people who have been exposed while in the early childhood environment are not required to quarantine as long as they do not have COVID-19 symptoms. They can attend school. They must wear a mask for 10 days except when eating, napping, or playing outside. However, they must test on days **one, three, and five** after the exposure. If they develop symptoms or test positive, they will enter a 10-day isolation period.

Anyone (vaccinated and unvaccinated) who has been exposed outside of the school setting can attend school and must test on days **one, three, and five** after the exposure. If they develop symptoms or test positive, they will enter a 10-day isolation period. They must wear a mask for 10 days except when eating, napping, or playing outside. They must provide a written plan for how they will keep the person who tested positive for COVID-19 isolated from the family. A paragraph or less sent via email to the site director will suffice.

If all of the caregivers in the home are positive, the child must quarantine for **five** days. The child will test on day 6 **and** return if the test is negative, and wear a mask through day 10.

Quarantine for children younger than 2 years old

Fully vaccinated children younger than 2 years who have been exposed while in the early childhood environment are not required to quarantine as long as they do not have COVID-19 symptoms. They can attend school. However, they must get tested by a clinician or at a testing site on days 5 or 6 after the exposure. If they develop symptoms or test positive, they must isolate for 10 days.

Fully vaccinated children younger than 2 years old who have been exposed outside of the school environment are not required to quarantine as long as they do not have COVID-19 symptoms. They can attend school. However, they must get tested by a clinician or at a testing site on days **5 or 6** after the exposure. If they develop symptoms or test positive, they must isolate for 10 days. They must provide a written plan for how they will keep the person who tested positive for COVID-19 isolated.

Unvaccinated children younger than 2 years old must quarantine for **five** days and return on day six with a negative test given by a clinician or at a testing site (testing on day 5 or 6).

Parents and caregivers who have completed the 5-day quarantine period can drop off and pick up their children at the outside classroom doors on days 6-10. They must wear a KN95 mask when dropping off and picking up.

***Please remember that at-home quarantine for 10 days after exposure to someone with COVID-19 is the safest way to prevent further spread of the virus.**

Isolation (for people who have tested positive for COVID-19)

All people who have tested positive for COVID will isolate for 10 days. They do not need to test after 10 days. However, they must be symptom and fever-free without medication for 24 hours before returning to school.

Travel

We will follow the CDC's guidelines for travel. Please click [here](#) for the most recent CDC travel guidelines.

 A graphic from the CDC titled "CORONAVIRUS DISEASE 2019 COVID-19 ". It features a photograph of an elderly couple walking outdoors. The woman is wearing a grey top and the man is wearing a blue jacket. The CDC logo is in the bottom left corner, and the URL "cdc.gov/coronavirus" is in the bottom right corner.	<p>COVID-19 and Travel CDC travel recommendations during the COVID-19 pandemic. www.cdc.gov</p>

Pediatric COVID-19 Vaccine Resources

1. Test4Free.org is vaccinating all age groups 6 months and older. This is an outdoor, drive-up option with several locations around Atlanta. Moderna only.
2. Children's Medical Group is accepting appointments for their Decatur location and you don't have to be an established patient. 404-748-9691. Moderna confirmed at the Decatur site.
3. Briarvista Pediatrics is also accepting non-established patients. They have Moderna and Pfizer on specific days. 770-239-2500.
4. Dekalb Pediatric Center is carrying Pfizer and they are accepting appointments. 404-508-1177

For more providers, please check this crowdsourced resource:

Spreadsheet view: [Find Vaccines for Kids Under 5 \(United States\) - Google Drive](#)

Vaccines.gov is also up and running – this is helpful if you prefer a pharmacy option, though most pharmacies have an age cutoff at 3 years old.

Be well,

Natalie Feagin
